Complex Spine Symposium *Zürich* *Revisions*

Revisions in spine surgery: What are the main reasons, how to avoid them? What are the best surgical revision techniques?

These are questions that every spine surgeon needs to answer daily. The two-day Complex Spine Symposium 2021 illuminates the answers with key talks given by Swiss University Hospital leaders in spine surgery and other world-renowned experts. Live surgical demonstration and a hands-on workshop will give the opportunity to take home technical tricks for revision surgery.

The main topics include:

- Pseudarthrosis and screw loosening
- End of construct failures and proximal junctional kyphosis
- Balance versus alignment of the spine in revision surgery
- Early revisions for infections and CSF leaks
- Adjacent segmented degeneration
