Balgrist International Shoulder Course 2022: Rotator Cuff Disorders

This three-day course will cover the entire spectrum of rotator cuff tears, from etiology to arthroscopic RC repair techniques, from basic science aspects to tendon transfers and from augmented repairs to the latest developments in reverse shoulder arthroplasty. We are honored and proud to welcome an international faculty of world known shoulder surgeons, who will present their latest research, perform live surgeries and share their knowledge in interactive case discussions. Don't miss this opportunity and join us in one of the most beautiful cities in the world.

PD Dr. Karl Wieser, MD
Course chairman
