## Nerve and Muscle Ultrasound Teaching Course 2026

**Friday/Saturday, March 6<sup>th</sup> & 7<sup>th</sup> 2026**  
Balgrist University Hospital, Zurich

University of  
Zurich UZH

Medical  
Center

It is our great pleasure to announce our next Nerve and Muscle Ultrasound Teaching Course. We welcome all medical professionals interested in nerve ultrasound to participate at this course. You will find a valued exchange with international ultrasound experts from different fields such as neurology, anesthesiology, pain therapy, radiology, rheumatology and hand surgery.

In addition to theoretical lectures regarding the application of ultrasound in different pathologies, emphasis is set on practical teaching lessons with hands-on workshops, examining normal anatomy on models and pathological findings on invited patients.

In order to keep it as much instructive and interactive as possible, **OnSite** places are restricted.

As an **OnSite** participant, you have 2 different options:

1. **OnSite regular:** 6 hands-on sessions (3 anatomy and 3 patient sessions)
2. **OnSite light:** 2 hands-on sessions (anatomy) and 4 “ask the experts” sessions in the auditorium, please see agenda below.

The live streaming of the entire teaching course for our **OnLine** participants will be offered through the professional video and live streaming company, yoveo <https://yoveo.ch>. In addition, we will offer several interactive “ask the experts” sessions to the **OnLine** participants, as well as the participants in the auditorium (**OnSite light**) during the 6 **OnSite** hands-on sessions.
