## Chiropractic Clinic

Our clinic is the only official training institution in the field of chiropractic medicine for medical students in Switzerland. They learn from our specialists, who use their manual and medical skills every day for the benefit of our patients.

To ensure that we can deliver the best possible care and provide comprehensive treatment for your symptoms, we work closely together with the following departments at Balgrist University Hospital: orthopedics, rheumatology, radiology with dose-reduced imaging, sports medicine, neurology, physiotherapy and occupational therapy.

### **What can we do for you?**

We treat people of all ages – from babies to the elderly. Our chiropractic diagnosis, treatment, prevention and rehabilitation are targeted towards pain and disorders of the musculoskeletal system. We treat you from a holistic perspective, with a particular focus on your spine, pelvis and peripheral joints.

### **Which pathologies do we treat?**

Our chiropractors treat many complaints that often originate in the spine. These include:

- Acute or chronic neck or low back pain
- Pain in the thoracic spine
- Pain radiating into the arms or the legs
- Pain in the peripheral joints of the hips, shoulders and elbows

### **Costs**

Your basic health, accident, disability or military insurance will cover the costs. Only applies for people with a Swiss health insurance and less the annual excess and personal contribution.

### **Appointments**

You can either make an appointment yourself (unless your basic insurance is part of an HMO model), or you can get a referral from your general practitioner or specialist (e.g. rheumatology, orthopedics).

### **Consultation hours**

Monday to Friday

7.00 a.m. to 12.00 p.m. and 1.00 p.m. to 6.00 p.m
